

# AURORA

CASSETTE AWNING  
WITH RETRACTABLE ARMS, WITHOUT SQUARE BAR

Thanks to Aurora's subtle design it's used primarily at home. It provides effective protection against the negative effects of sunlight and creates a pleasant shade in the hot summer.

The construction consists of a fully closed cassette, retractable arms, a fabric roller tube and a control mechanism. The front profile closes the cassette when retracted. It can be mounted on the wall or onto the ceiling. The inclination of the arms can be adjusted in the range from 5° to 70° when fixed to the wall and from 18° to 90° when installed on the ceiling.
