

# CUBOLA

A contemporary pergola distinguishes itself by its sleek and modern design. A high level of engineering design enables the Cubola to be adapted to almost any location. It provides us with contemporary outdoor living whether you are dining or lounging.

The frame of the Cubola is made from high grade aluminium joined with specially developed internal corners which guarantee perfect stability. They also ensure that nuts and bolts are hidden from outside view. The aluminium frames are powder coated producing a durable finish.

Motorised side Zip Screens can be installed to provide side protection from the wind or simply if you prefer seclusion. These can be fitted on one or all four sides of the Cubola.

Operating Cubola is easy, all can be done via wireless controls. The Cubola can be installed as a wall mounted or freestanding pergola.
