Installation
on existing structures

A simple and practical solution for any patio. The versatile use and design of this product makes it suitable for residential and commercial properties.

The pergola consists of guide profiles (80 x 40) with pulleys, profiles for fabric and a control mechanism. The fabric profiles are guided by small carriages to their parking position.

The construction allows installation in four ways: wall and floor, freestanding, between walls and wooden beams or to the ceiling to shade skylights. Modules can be coupled to increase overall dimensions and increase your covered space.

COLOUR

RAL 9010 white
All plastic parts and rope
available in black or white
only.
