

# VERANDA BOX

Veranda Box is a great solution for shielding any glazed surfaces such as conservatories and skylights. It'll also fit existing pergola structures with glass or polycarbonate. This conservatory awning will keep the sun away and the fabric clean thanks to its sturdy cassette.

The construction consists of lateral guides with in-built gas pistons, a front profile, a fabric roller tube, a cassette and a control mechanism. The lateral guides are flexible in positioning on the existing structure and they can be longer than the supporting structure allowing shading of the front glass surfaces. Eyelets in the fabric allow water to drain out. Minimum inclination is 15°.

**COLOUR**

RAL 9010 white  
RAL 1013 cream  
RAL 8014 brown  
RAL 7016 anthracite

All plastic parts available in black or white only.

**CONTROL**

Electric Motor

**FABRIC**

Acrylic  
Screen (Soltis, Serge)

**DIMENSIONS**
