

VERANDA BOX PERGOLA

Veranda Box is ideal solution for any patio. With an excellent quality to price ratio it will protect your patio from the sun and light rain. Despite its sturdy cassette protecting the fabric when retracted, the overall fell is light and airy.

The construction consists of lateral guides with in-built gas pistons, a front profile, a fabric roller tube, a cassette, a control mechanism and two frontal legs. The lateral guides can be longer than the frame allowing shading of the front like a traditional awning. Eyelets in the fabric allow water to drain out. Minimum inclination is 15°.
